Replenish your body's glycogen reserves

Great-tasting sports drink available in lemon-lime or tangerine

Convenient and ready-to-drink

Rehydrate during illness and exercise

Isotonic beverage with electrolytes

Replace electrolytes lost through perspiration

With B vitamins & calcium

GLYTACTIN: EXPERTLY DESIGNED; CLINICALLY PROVEN Glytactin was proven to be statistically more effective than standard AA formulas in improving several key clinical parameters important in describing the nutritional management of PKU.

Specifically, Glytactin was reported to promote a feeling of fullness (satiety), delay absorption of AAs, as well as improve protein retention. Glytactin minimized differences between postprandial and fasting plasma phe levels thus indicating an improvement in overall phenylalanine control. ~ Studies available upon request.
